

Canadian Handywoman's Cottage & Home Care Services

Home or Cottage New-Owner Orientation Services

You've bought your dream cottage or rural home and think to yourself 'now what...I've never even heard of a sump-pit before?!?'. Relax, I can help! Together we will navigate the ins and outs of why and how things work around your place. I will patiently walk you through the often confusing and overwhelming principals of home maintenance. Let's work together so you not only understand but you'll be able to take care of and really enjoy that new to you property.

There is a dramatic learning curve and I've been there. I moved from the GTA where the utilities were invisible and municipal services were easy to access and abundant. I know all too well it is not easy to navigate the overwhelm of it all, and I've not only experienced it, but I've also embraced it. I now own and operate a professional handywoman service. Let me help you! I can introduce you to your new rural home or cottage and show you where things are and how they work. Let me walk you through a Home Maintenance Orientation.

Systems, Utilities and Lifestyle Topics to Cover:

- Septic
- Wells and Water
- Plumbing
- Fireplaces
- Heating & Cooling
- Electrical
